03

Orbital motion

8 counts into set | Cumulative count 16 | 120 base BPM · see tempo map | 64 performers

BACK SIDELINE

FRONT SIDELINE

Four concentric orbits. Check crossing paths in the transition inspector.

Coordinates in yards. Front sideline is the bottom of the chart. • Squidware

Variable recording alignment

16 counts · 10.500 seconds · page 1 of 1

Ranges use absolute show counts. BPM ramps are linear over counts. Fermatas hold positions after that count’s click; recording time continues. Offset: 0.4 seconds. Recording alignment applied: interval durations, BPM and fermatas below include the accepted anchors. Add the offset to Start seconds for recording time.

Show counts	BPM / fermata	Start seconds	Duration seconds
0–4	96.000 → 96.000 BPM	0.000000	2.500000
4–8	120.000 → 120.000 BPM	2.500000	2.000000
8–12	80.000 → 80.000 BPM	4.500000	3.000000
12–16	80.000 → 80.000 BPM	7.500000	3.000000
